

## Contest Math 7-9

Students work individually and in small groups to prepare for math competitions including the Mathematics Olympiad, MathCounts, AMC 8, and AMC 10.

Instructors group students based on students' goals and diagnostic test results. Students discuss concepts and strategies, solve and review problem sets, complete exams under simulated contest conditions, and work individually with instructors.

*The full list of goals, topics, and activities for this course will be posted soon.
